The zoo is a place where many different animals live. You can see lions, tigers, elephants, and many more animals there. A lion is a big cat with a [correct]mane[correct] around its head. Elephants are the largest land animals and they have long [correct]trunks[correct] to help them eat and drink.

Giraffes have long [correct]necks[correct] that help them reach leaves high up in the trees. Zebras have black and white [correct]stripes[correct] all over their bodies. Every animal at the zoo has something special that makes it unique.

Indicate if the following statements are true or false:

1. A lion has a trunk. **False**
2. Elephants use their trunks to eat and drink. **True**
3. Giraffes have short necks. **False**
4. Zebras have black and white stripes. **True**

Select the correct answer for each question:

1. A lion has a _____ around its head.
